## Just one drop of water can ruin your race...

**Dry up swimmers ears  
with the  
New Sahara DryEar**

Yes! Now you can get that annoying water out of your ears. The Sahara **DryEar** rechargeable ear dryer is a highly sophisticated device with a computer chip, heater and fan that regulate airflow automatically. The warm airflow gently dries water clogged ear canals.

The Sahara **DryEar**, rechargeable, warm air ear canal dryer is just what swimming competitors and coaches alike need to keep you in the race. It was developed by an M. D to dry up the moisture in the ear canal where bacteria and fungi grow. The **DryEar** is the simplest and most effective way to dry your ear canal in 80 seconds.
